REPORTING

#### orida Migrant Student Information Exchange

Welcome to the Florida Migrant Student Information Exchange (FLMSIX). This System is to be accessed by authorized users only.

The FLMSIX is a web-based portal that links states' migrant student record databases to facilitate the national exchange of migrant students' educational information among the states. The primary purpose of FLMSIX is to make migrant student information available to authorized school personnel to support them in making decisions on student enrollment, grade or course placement, and accrual of credits.

The timely transfer of education records for migrant children between schools has been a longstanding challenge. Migrant children often enroll in multiple schools for varying amounts of time each year as their families migrate in search of temporary or seasonal work in agriculture or fishing. MEP staffs continue to find it difficult to share and consolidate student information that schools, local educational agencies, and states collect on migrant children in a timely and meaningful way that helps school personnel make appropriate decisions when the students arrive. These conditions and those shown below prompted the need for an exchange of records.

**High Movement** — Highly mobile migrant student population

Short Notice — Students move from state-to-state often without notice

Lack of Data — Timely and accurate educational information not always available

Placement Errors — Students placed in incorrect courses or grades

Loss of MEP Services — Students not provided the most beneficial MEP services
